What can we do for GX?

- Improve measure and action
- Bigger scale implementation

- Situational analysis
- Data visualization
- Make hypothesis

- Evaluate effect
- Compare Before vs After

- Carry out measure
- Take action

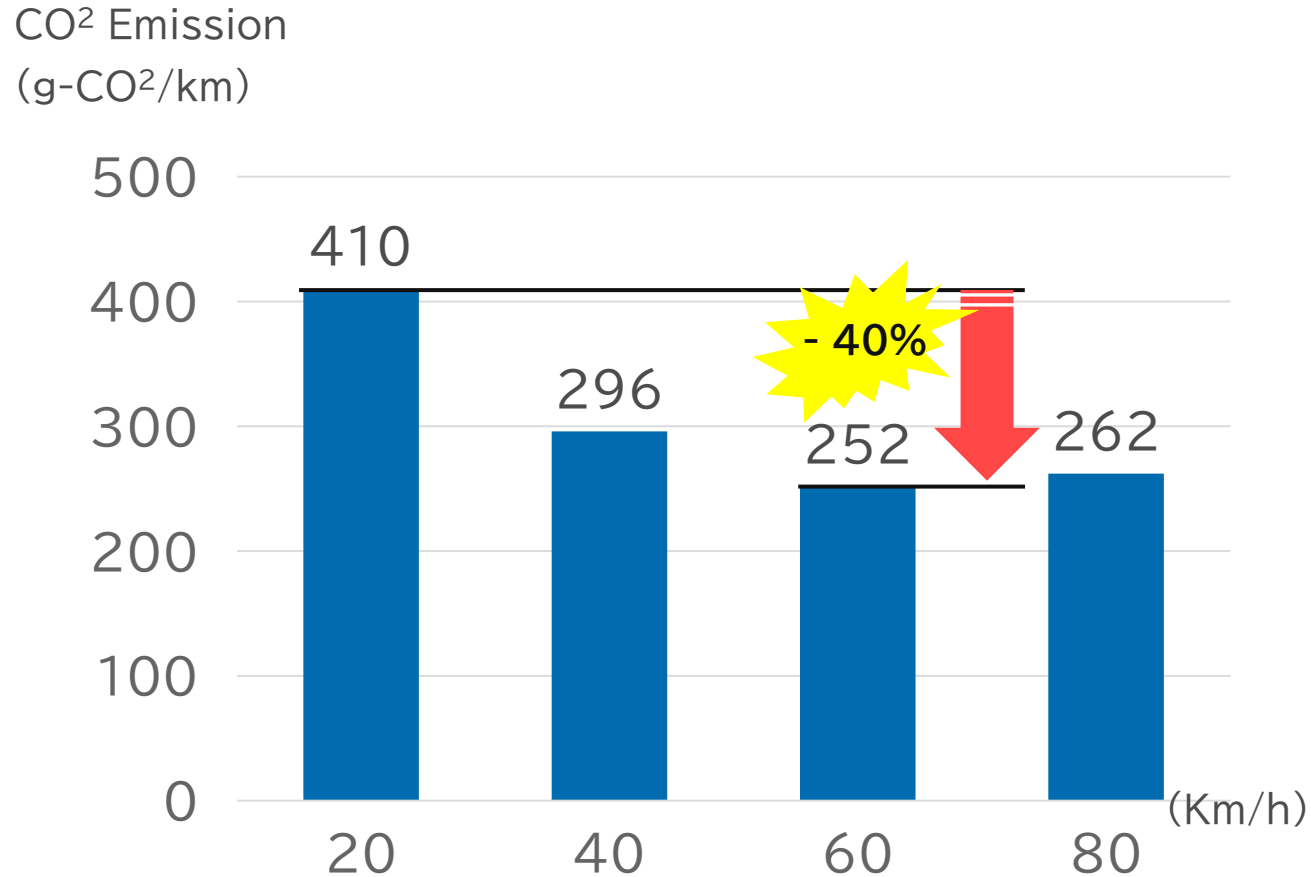

Case Study: Solve traffic congestion for CO₂ reduction

Traffic Congestion is a common issue all over the world...

Case Study: Solve traffic congestion for CO² reduction

- Higher driving speeds improve fuel consumption and emit less CO².
- Slower speed is usually arisen from traffic congestion.
- Smooth traffic will reduce CO² emission in your city. (also ease your stress!)

Ministry of Land, Infrastructure, Transport and Tourism, Japan

To solve congestion, we should understand current situation.

Case Study: Solve traffic congestion for CO² reduction

- How BriefCam can detect slower speed.

BriefCam

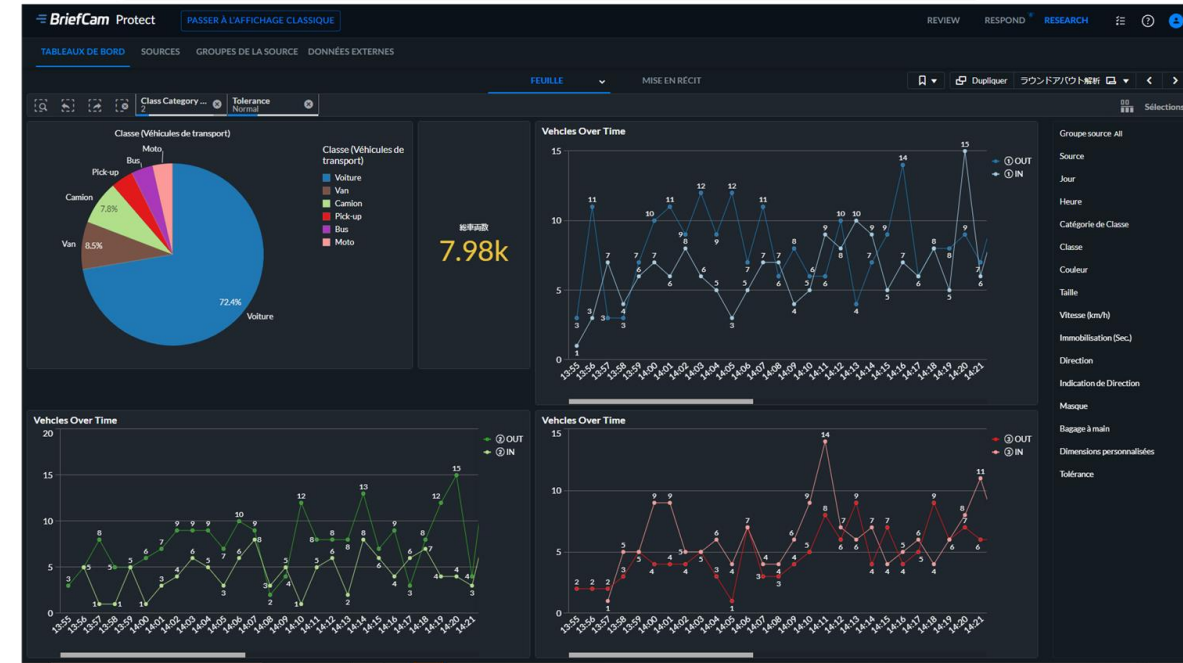

Original Video

Case Study: Solve traffic congestion for CO² reduction

- Visualize Traffic Data by BriefCam

Data can be sorted by **vehicle type/speed/time/direction** etc.

Case Study: Solve traffic congestion for CO² reduction

- Take Data-driven Measure

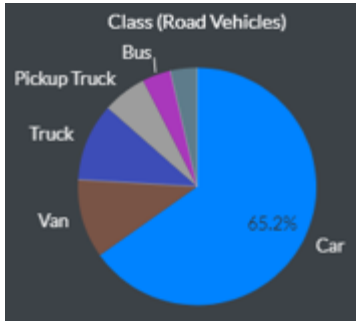

- ✓ Congestion charge
- ✓ Public transportation optimization
- ✓ Vehicle restriction by license plate number
- ✓ Reversible lane
- etc.

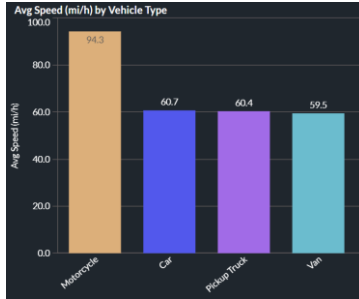

Data will help you take effective action and improve congestion. 9

We can detect more...

● Traffic monitoring

vehicle type

Speed

Color

Heat map

Direction etc.

● Improve Traffic Congestion

People Intrusion

Reverse Run

Dwelling etc.
